

DARK MOURNING

MTV Europe
Daryl Fidelak | GM

Had the new Dark Mourning album EP hit my desktop this AM. Usually I pass music to my talent and music manager, I decided to give it a spin. My first reaction was give the old comparison shoot and say its Sepultura meet Porno For Pyros meets Johnny Cash... But let's try something a tad more original and music focused. The guitar riffs come off strong in a good way without overpowering the vocals. While the lyrics are dark, hence the name right;) the melody, and I hope I can use that term in the Metal world, really ties everything together. Maybe "tight" is over used but I have to say all songs on the album are tight and concise... I'm not a Metal fan, so I'm approaching this from the music biz side. My conclusion, these guys deserve your attention!

I look forward to the band's next steps and will be more than happy to get their videos on MTV here in Europe.

With their heavy vocals, heavier guitar riffs and hard pounding drums...Dark Mourning has proven that Rock 'N Roll is NOT dead.
